Hexagon 'endless book' Book Structure

Create a 23 page hexagon shaped 'endless book.
I created this template for my 'Home' artist book (link at th ebottom of the page)

Step 1

Draw and cut out your Hexagon grid
5x and 4x hexagons over 5x rows
 - row 1 - 5 hexagons
 - row 2 - 4 hexagons
 - row 3 - 5 hexagons
 - row 4 - 4 hexagons
 - row 5 - 5 hexagons

Step 2

Cut the cut lines, as indicated below. You can see the page numbers on each hexagon indicating how the book will fold once cut and folded.

Step 3

Add alternate folds* to fold and wrap the book into itself:

- - - - - -   fold out

• • • • • •   alternate fold direction - fold in

Start cutting here

Following the alternate folds will fold the book into itself and 'wrap' around the corners of the 5/4 column grid
