

TURKISH MAP FOLD - SQUARE PAPER

You will need:

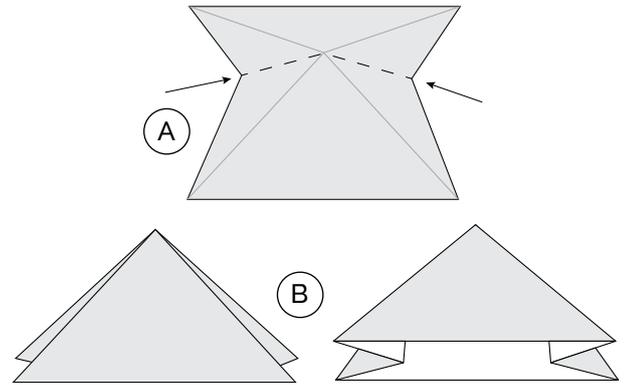

1x square sheet light- to medium-weight paper

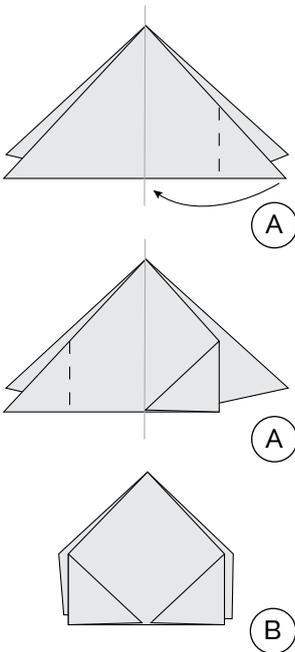

1 - Fold the paper in half diagonally, in both directions as shown. Crease well and unfold.

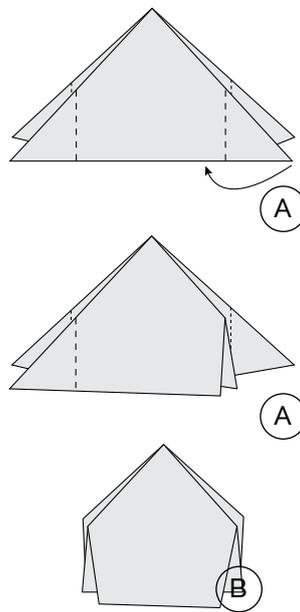

2 - Turn paper over. Fold in half horizontally as shown. Crease well and unfold.

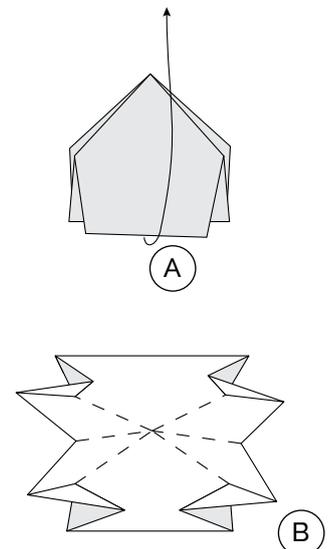

3 - Push in on both sides of the horizontal fold (A) toward the centre. This will form a folded triangle (B - same structure, different views).

4 - Take a corner (A) and fold it to the middle of the structure. Repeat for all corners (B). As you fold each corner, also fold them back on themselves. This will help when folding the next step.

5 - Pull the corners out and return to the triangle shape. Take a corner (A) and push it in on itself, toward the inside the structure. Repeat for all corners (B).

6 - Take the bottom open edge (A) of the structure, lift to open to reveal the inside of the structure (B).
